

Wednesday, 5 October from 13:00-18:00h

COAST organizes in collaboration with FBBasic and Cirmar a half-day symposium

“Quality assurance in the recycle chain”

During this symposium we will focus on creating awareness, generating further ideas, and networking on the role of quality assurance, based on analytical sciences and/ or audit trails.

Various experts from the plastic recycling world, quality assurance organizations and polymer producing industry will shine their light on the status here, the developments needed and the impact it will have on the entire plastic industry.

Breakout sessions will allow all participants to share their ideas, ask questions and to scout for collaborations.

Programme

- Welcome
by Anton Schotman, Innovation Broker COAST
- Vision: from passive to active recycling
by Frans Beckers, FBBasic/Cirmar
- Overview on standardization and quality in the chain
 - Standardization in the recycle chain from an ISO/CEN perspective
by Huub Omloo, ISO/Covestro
